Emak joins the Intermonte Valore Italia Index

Emak has been selected to join the Intermonte Valore Italia Index, which brings together 100 listed Italian SMEs distinguished by their financial strength, transparency, and investability. The initiative aims to enhance their visibility within the financial community and expand investment opportunities in the small and medium-sized enterprise segment.

Bagnolo in Piano (RE), 8 July 2026 – **Emak**, one of the world's leading players in the gardening, forestry, agriculture, washing and industrial markets, **has been selected among the 100 companies** listed on the Italian Stock Exchange that make up the **Intermonte Valore Italia Index**, dedicated to SMEs with a market capitalization below €1 billion and not included in the FTSE MIB Index.

*"Emak's inclusion in the Intermonte Valore Italia Index is an important recognition of our ongoing **commitment to maintaining high standards of transparency and governance**"* - commented **Luigi Bartoli**, Chief Executive Officer of the Emak Group - *"We believe that initiatives like this can contribute to increasing the visibility of high-quality listed Italian SMEs within the financial community, fostering a more effective appreciation of their distinctive strengths."*

The Index was created with the aim of enhancing the visibility of listed Italian small and medium-sized enterprises, creating a meeting point between entrepreneurship, the capital markets and the Italian economic system. It represents a true cross-section of the finest expertise of the Italian economy, helping to broaden and diversify investment opportunities beyond traditional indices for both domestic and international investors.

Companies are selected based on rigorous technical and financial criteria designed to ensure adequate levels of liquidity, transparency and investability. These include minimum free float, strong governance standards, analyst coverage, financial sustainability and debt levels, as well as appropriate representation within the Index itself.

The Index is part of **PMI2Change**, the innovative initiative launched by Banca Generali on 1 July 2026 at Palazzo Mezzanotte of Borsa Italiana. The project is designed to support the growth and competitiveness of Italian entrepreneurs by fostering the development of listed Italian SMEs. The project addresses the problem of limited liquidity and valuation of listed SMEs, helping to create the best conditions for a more efficient matching of capital and businesses.

The initiative was created by leveraging the expertise of Intermonte, a leading Italian operator in the sector with more than thirty years of experience in the financial markets - particularly in SME research, sales & trading, market making and investment banking - an integral part of the Banca Generali Group since the beginning of 2025.

Starting from the Index, Banca Generali, together with Investlinx and Intermonte, has launched a new actively managed and PIR-compliant ETF that will invest primarily in the universe defined by the Index itself. Banca Generali has committed to supporting the launch of the instrument with an initial fundraising of €100 million in the first few months, with gradual increase in exposure until reaching €500 million over the medium term. It is therefore estimated that the initiative could help generate new investment flows of €1-2 million per day, representing over 5% of the Index's free float.

"*We are confident that PMI2Change will help generate growing interest in Emak among investors, supporting long-term value creation for all our shareholders and stakeholders, while enabling the market to gain an even greater appreciation of the **Group's industrial strength, execution capabilities and growth prospects***," concluded the CEO Bartoli.
